

Lead Time Updates as of 6/16/2022

While most parts are still at the 16 week lead time, there are specific parts that we are now able to ship within 2 weeks.

Please note that if “2-week” parts are ordered with “16-week” parts, the complete order will default to the 16 week lead time, so you may want to place separate orders. The parts we can ship within 2 weeks are as follows:

- All Freewheels (large orders from shops may take longer)
 - ENO single, Dos ENO, and Trials
- All Freewheel Parts
 - Outer gears, engagement kits, lockrings, bearings, and seals
- All Bottom Bracket Parts
 - MR30 spindles, BB cup spacers, BB spindle spacer kits, BB seals, BB bearings, T47 BB sleeves
- All Crank Parts
 - Crank bolts, crank washers, extractor caps, adjustable rings, chainring lockrings, and MR30 spindles
- Some Headset Parts
 - Crown races and bearings
 - ...but **not** headset spacers right now.
- All Hub Parts
 - Axle kits, freehub bodies, bearings, engagement kits, fixed gear lockrings, and ISO disc mounts
- Anything not listed here is still on a 16 week lead time!
